

Please do not weaken or do away with the "Do Not Call Program."
This program is important because many families need this to prevent interruptions in their already limited amount of "family-time." Many of these calls start between eight o'clock in the morning and do not stop until eight or nine o'clock in the evening. That in and of itself is totally out of control. I value the time I have with my child and do not appreciate it being interrupted with petty attempts to sell me products. If I really want a particular product, I will go out to whatever store I need to go and get it; I DO NOT need a telemarketer telling me that I "need" their product.
Thank you for your time.
